Seminar on Sustainability Ratings and Best Practices

Highlights

2026 11 SEP

More than 40 participants from nearly 30 companies attended the "Executive Event – Transforming Sustainability Ratings and Supply Chain Data Management into Best Practice and Your Brand's Competitive Edge" organised by ROMA. The event featured a 2-hour sharing session with three distinguished speakers: Dr. Carlos Lo, Professor at The Chinese University of Hong Kong (CUHK), Mr. Bill Tsang, Head of ESG from Roma Green Finance Limited, and Ms. Lavin Yeung, Head of BD & Marketing at ESG Matters Asia.

Dr. Lo opened the session by introducing the Strategic Sustainability Benchmarking Scheme (SSBS), a sustainability rating developed by the CUHK Centre for Business Sustainability. The scheme assesses companies' sustainability performance through a structured ESG framework covering values, management processes and measurable impacts across key stakeholder groups. Mr. Tsang then shared insights into the evolution and significance of ESG ratings, supported by case studies and practical examples for improving corporate ratings. He emphasised that climate-related scenario analysis and transition planning are essential to a company's sustainability journey. Ms. Yeung concluded by exploring the importance and challenges of Scope 3 emissions data management and the challenges businesses face in collecting emissions data and engaging suppliers. She also introduced online learning courses for emissions calculation.

Special thanks goes to H Properties for providing a seminar venue, namely, "Happy Moment", located at Infinitus Plaza, Sheung Wan. We are also grateful to the H Properties team for sharing the ESG strategies they have put in place. Their experience showed how a business can define happiness while putting sustainability into practice.

Celebrating Mid-Autumn Festival with Care and Appreciation

As the Mid-Autumn Festival approaches, we would like to share a small but meaningful moment from our team.

This year, our company prepared a special festive treat for all colleagues — **a selection of butterfly cookies** from Regal Hotel Hong Kong. While the gift itself is simple, the intention behind it is clear: to express our genuine appreciation for the dedication, hard work, and positive spirit that every team member brings to our organisation every day.

We hope this gesture brought a touch of warmth and joy to our colleagues during the festive season. As the full moon rises, we extend our sincere Mid-Autumn wishes to you and your family as well — may you enjoy good health, happiness, and meaningful time with those who matter most.

Thank you for your continued trust and support. We look forward to continuing our journey together.

FIFA World Cup 2026 Prediction Challenge – July 2026

The FIFA World Cup 2026 delivered a tournament full of drama, and our colleagues rose to the occasion with their predictions. We are delighted to announce that 8 participants correctly predicted both finalists, Spain and Argentina, and 2 of them predicted the final World Champion, Spain! Their foresight, and perhaps a touch of footballing instinct, has earned each of them a cash prize! Adding to the excitement, our senior management thoughtfully allowed a "Later Start" on the morning of the final on 19 July so colleagues could enjoy the action. Congratulations to our 8 "Prediction Challengers" on a remarkable call, and to every colleague who took part, thank you for bringing such energy to the unforgettable journey of the FIFA World Cup 2026!
