INTERIM REPORT 2020-2021

CHARACTERISTICS OF GEM OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been positioned as a market designed to accommodate small and mid-sized companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration.

Given that the companies listed on GEM are generally small and mid-sized companies, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this report, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

This report, for which the directors of Roma Group Limited (the “Company” and the “Director”, respectively) collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on GEM of the Stock Exchange (the “GEM Listing Rules”) for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that to the best of their knowledge and belief, the information contained in this report is accurate and complete in all material respects and not misleading or deceptive, and there are no other matters the omission of which would make any statement herein or this report misleading.

(c) Basis of measurement

The Interim Financial Statements have been prepared under the historical cost basis as modified by the revaluation of investment property, financial asset at FVOCI and financial asset at FVTPL which are carried at fair value.

(d) Fair value measurements of financial instrument

Fair value estimates are made at a specific point in time and are based on relevant market information and information about the financial instruments. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

The Group's financial assets at FVTOCI are carried at fair value as at 30 September 2020. The following disclosures of fair value measurements use a fair value hierarchy which has three levels:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities that the Group can access at the measurement date
- Level 2: inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly
- Level 3: unobservable inputs for the asset or liability

The Group's policy is to recognise transfers into and transfers out of any of the three levels as of the date of the event or change in circumstances that caused the transfer.

(d) Fair value measurements of financial instrument *(continued)*

Disclosures of level in fair value hierarchy at 30 September 2020:

Description	Fair value measurement using:			Total
	Level 1	Level 2	Level 3	30 September
	HK\$'000 (unaudited)	HK\$'000 (unaudited)	HK\$'000 (unaudited)	2020 HK\$'000 (unaudited)

(b) Financial asset at FVTPL				
- Listed equity securities	403	-	-	403
- Derivatives	-	-	82	82

Disclosures of valuation process used by the Group and valuation techniques and inputs used in fair value measurements:

During the six months ended 30 September 2020, there were no transfer between Level 1 and Level 2, or transfers into or out of Level 3 (31 March 2020: nil). The Group's policy is to recognise transfer into and out of fair value hierarchy as at the end of the reporting period in which they occur.

The Group's financial controller is responsible for the fair value measurements of assets and liabilities required for financial reporting purposes, including level 2 and level 3 fair value measurements. The financial controller reports directly to the Board for these fair value measurements. Discussions of valuation processes and results are held between the financial controller and the Board at least twice a year.

(d) Fair value measurements of financial instrument (continued)

For level 2 and level 3 fair value measurements, the Group will normally engage external valuation experts with recognised professional qualifications and recent experience to perform the valuations.

Below is a summary of significant unobservable inputs to the valuation of financial instruments as at 30 September 2020:

	Valuation technique	Significant unobservable inputs	Relationship of unobservable inputs to fair value
At 30 September 2020			
Equity instruments – unlisted	Guideline public company marketability method	Price-to-sales ratio: 1:0.52	An increase in the ratio will result in an increase in the fair value of the unlisted equity securities
		Discount for lack of marketability: 15.8%	An increase in the discount rate will result in a decrease in the fair value of the unlisted equity securities
Share options	Binomial Option Pricing Model	Expected volatility 133.37%	The higher the expected volatility, the higher the fair value

12. PROPERTY, PLANT AND EQUIPMENT

During the six months ended 30 September 2020, the Group acquired items of property, plant and equipment with total costs of approximately HK\$85,000 (six months ended 30 September 2019: approximately HK\$41,000).

At beginning of reporting period/year	11,000	12,500
Decrease in fair value of investment property	(1,000)	(1,500)
At end of reporting period/year	10,000	11,000

Investment property represents property located in Hong Kong held as lessor under operating leases to earn rentals or for capital appreciation.

Investment property was revalued on 30 September 2020 by an independent professional valuer. The valuation, which conforms to The Valuation Standards of the Hong Kong Institute of Surveyors, was arrived at using direct comparison approach in the course of valuation.

The direct comparison approach is a method of valuation by making reference to comparable market transactions. This approach rests on the wide acceptance of the market transactions as the best indicator and pre-supposes that evidence of relevant transactions in the market place can be extrapolated to similar properties. Appropriate adjustments and analysis are considered to the differences in location and other characters between the comparable properties and the subject properties.

The fair value of the investment property is a level 2 recurring fair value measurement.

There were no changes to the valuation techniques during the six months ended 30 September 2020.

The fair value measurement is based on the above property's highest and best use, which does not differ from its actual use.

During the six months ended 30 September 2020, there were no transfers between level 1 and level 2, or transfer into or out of level 3. The Group's policy is to recognise transfers between levels of fair value hierarchy as at the end of the reporting period in which they occur.

14. GOODWILL

The carrying amount of goodwill mainly arose from the acquisition of Leo Asset Management Limited (“Leo Asset”) during the year ended 31 March 2020. The net carrying amount of goodwill can be analysed as follows:

Decrease in fair value of financial asset	(1,445)	(9,746)
At end of reporting period/year	2,335	3,780

The balance represented the Group’s strategic investments of 19.9% equity interest in Greater China Appraisal Limited (“Greater China Appraisal”). The investment was not accounted for in an equity method as the Group does not have the power to participate in the operating and financial policies of Greater China Appraisal, evidenced by the lack of any direct or indirect involvement at board level.

The Group designated its investment in this unlisted investment as financial asset at FVTOCI, as this investment is held as long-term strategic investments that is not expected to be sold in the short to medium term.

The customers are obliged to settle the amounts according to the terms set out in relevant contracts. Interest rates are offered based on the assessment of a number of factors including the borrowers' creditworthiness and repayment ability, collaterals as well as the general economic trends. The Group's loan principals charged interests at contract rates ranging from approximately 8% to 48% per annum (31 March 2020: approximately 8% to 48% per annum).

The Directors consider that the fair values of loans and interests receivable are not materially different from their carrying amounts.

Notes:

(a) Bank Borrowings

As at 30 September 2020, the bank borrowings of HK\$36,342,000 (31 March 2020: HK\$43,345,000) were secured by bank deposits of HK\$41,029,000 (31 March 2020: HK\$48,157,000) placed in a bank. Interest is charged at London Inter-bank Offered Rate +1% (31 March 2020: Hong Kong Inter-bank Offered Rate +1%) per annum.

The above banking facilities of the loans are subject to the fulfillment of covenants relating to minimum requirement of pledged bank deposits and compliance of the bank's administrative requirements, as are commonly found in lending arrangements with financial institutions in Hong Kong. If the subsidiary were to breach the covenants, the drawn down facility would become repayable on demand.

As at 30 September 2020, the bank borrowings were scheduled to repay within one year or on demand.

The Group regularly monitors the compliance with these covenants and the scheduled repayments of the loans and does not consider it probable that the bank will exercise its discretion to demand repayment for so long as the subsidiary continues to meet these requirements. As at 30 September 2020, none of the covenants relating to drawn down facilities had been breached.

(b) Other Borrowings

As at 30 September 2020, the other borrowings of HK\$5,800,000 (31 March 2020: HK\$12,300,000) were unsecured, interest bearing at 6% per annum and due for payment.
